

Date: Buenos Aires, 2nd December 2011
Subject: Global AIM Conference Invitation

Dear Sir/Madam,

Since 2006 the Global AIM Consortium organized a series of Global AIM Congresses started in Madrid 2006 and ended in Beijing 2010. IFAIMA - International Federation of Aeronautical Information Management Associations, recognized the success of those events throughout all the aeronautical community.

IFAIMA decided then to take the lead in organizing these important AIM events and started last year in Lisbon, Portugal with the first one. While some States are pretty much advanced on AIM Implementation, others haven't quite really started and need all the help they can get.

In collaboration with CPAAAAA - Argentinean AIM Association, IFAIMA decided to organize the 2012 event in Buenos Aires, Argentina.

The theme will be, "AIM Implementation Opportunities". It's important we continue to involve all the stakeholders on the procurement of these important objectives.

All the major international organizations (ICAO, CANSO, Eurocontrol, etc.) will take part of the event and a participation of around 200 persons ordinary from all over the AIM World will be there. An exhibition area parallel to the Conference will also be available where you can get acquainted with representatives of the industry and their state of the art AIM products. They will be there to provide and assist the participants with their expertise, demonstrating how their products work first hand.

We are pleased to invite you to be present at the "Global AIM Conference", Buenos Aires, Argentina, which will take place on the 28th to the 30th May 2012 at the Panamericano Hotel.

In case you wish to make a Presentation at the event regarding the proposed theme, would you care to inform IFAIMA?

You may find information about IFAIMA and the Conference on our website <http://www.ifaima.org>.

Sincerely yours,

The Executive Board President

Fernando Henriques Lopes
